

Morphiya | Scientific & Educational Activities Report

October- December

Between October and December, several promotional, scientific and institutional activities were carried out in support of the Morphiya brand, within high-profile congresses, training programs and clinical settings in the fields of aesthetic and regenerative medicine.

“EXOSOMES”

MORPHIYA
EXOMORPHIC BIOTECH™

Agorà Congress- Aesthetic Medicine

Brand Presentation & Scientific Dissemination

📍 Milan | 🗓 9-11 October

During the Agorà Congress in Milan, a key reference event for aesthetic medicine, the Morphiya brand was presented to a wide audience of medical professionals through targeted educational activities focused on the product portfolio and its clinical applications.

In addition, the Morphiya technology was discussed in dedicated scientific sessions by Dr. Francesco Binaschi and Dr. Alessandro Casadei, who highlighted the principles, advantages and potential of the technology, contributing to increased awareness and interest among attending physicians.

SICPRE Congress -Plastic & Reconstructive Surgery

International Scientific Exchange & Brand Presentation

📍 Naples | 🗓 30 October - 1 November

At the SICPRE Congress in Naples, dedicated to plastic and reconstructive surgery, the Morphiya and Lipocube brands were presented, generating strong interest among participating specialists.

The event also represented an important opportunity for scientific exchange, during which we had the pleasure of meeting one of the founders of the technology, Dr. Sterodimas, further strengthening international scientific dialogue and the overall value of the project.

ECAMS Training - Hair Transplantation & Regenerative Medicine

Scientific Presentation on HYBROSOME™ Technology

📍 Cremona & Milan | 📅 2-3 November

Within the framework of the ECAMS Training – Hair Transplantation & Regenerative Hair Version 3.0, the team delivered a scientific presentation focused on HYBROSOME™ technology and the Morphiya line, sharing its biotechnological foundations and application perspectives in the field of regenerative trichology. This training represented a valuable educational opportunity for attending professionals and supported the dissemination of an innovation-driven scientific approach. We would like to extend our sincere thanks to Prof. Max Brambilla and Dr. Christian Bisanga for the invitation and for their contribution to the advancement of regenerative medicine.

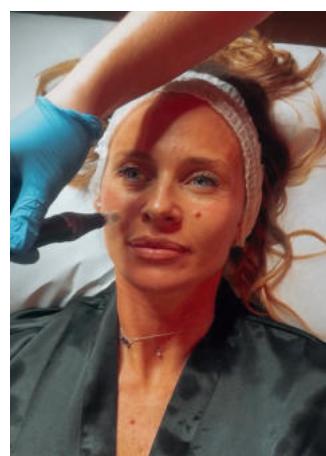

Open Day & Center Inauguration

Clinical Introduction of Advanced Aesthetics Solutions

📍 Naples | 📅 2 December

On December 2nd, we took part in the open day and inauguration of the Viviana Estetica Evolutiva center in Naples. The event provided an opportunity to engage with both professionals and patients, presenting Morphiya as an innovative solution in the field of advanced aesthetic treatments.

Master's Program in Aesthetic Medicine

Educational Support & Live Case Demostration

Rome | 18 December

On December 18th, we participated as supporters in a Master's Program in Aesthetic Medicine at UniCamillus University.

As part of the training activities, a Live Case session was conducted using the Derma Kit and Scalp Kit protocols on models, offering participants a practical and demonstrative experience of the technology's clinical applications.
